

Industrial Visit

Industrial visit was planned by Faculty of Engineering & Technology on 18th October 2023 to TSPL Banawali. The objective of the visit is exposure to real world practices: To familiarize participants with the actual working environment, processes, technologies, and best practices used in the industry. This can help bridge the gap between academic knowledge and practical skills. During the visit, students had the opportunity to witness various aspects of thermal plant's operation, gaining insights into the complexities of power generation. The practical exposure provided them with a deeper understanding of the concepts learned in the classroom.
